As a recent graduate in Computer Science with a strong interest in Artificial Intelligence, I am excited to apply my skills and knowledge to real-world challenges. I have a solid foundation in programming languages such as Java, Python, and C++, and have experience working on projects involving data structures, algorithms, and software design. In addition to my technical skills, I am a self-motivated and detail-oriented individual with excellent problem-solving and communication skills. I am passionate about using AI to solve complex problems and drive innovation, and I am eager to continue learning and growing as a software engineer in this field. I am confident that I can contribute to the success of your team and make a meaningful impact with my work

Objective

To advance my career as a software engineer with focus on AI Implementation and become a thought leader in the field through continuous learning and the development of innovative solutions. I am seeking a challenging and dynamic work environment where I can utilize my technical skills, problem-solving abilities, and communication skills to make a positive impact on the development of software systems and their impact on society.

Education

BSc.(Honours in Computer Science), University of Wolverhampton

2019 - 2022

School Leaving Certificate (S.L.C), St. Lawrence High School

2017 - 2019

Secondary Education Examination (S.E.E), Pragati High School

2017

Professional Experience

IT Assistant, The Nepal Distilleries PVT.LTD

As an IT assistant, I had provide support and maintenance for an organization's technology infrastructure which includes installing and configuring hardware and software, troubleshooting technical issues, managing networks and servers, and providing technical support to end users. I was also responsible for creating and maintaining documentation, researching and recommending new technologies, and assisting with the development and implementation of IT projects and initiatives.

Achievement:

- Performed help desk troubleshooting and problem resolution for end-user application software, hardware, and remote access connectivity supporting over many personal computers.
- Developing and implementing IT projects and initiatives that have a positive impact on the organization
- Set up Network drives to allow faculty and staff the ability to share and access files.
- Configure copiers and printers for network connections to allow wireless and network printing.

07/2020 – 10/2020 Kathmandu, Nepal

Technical Skills

- Python, Flutter, Java, Django, C#
- UX/ UI Design and Presentation
- Networking and Linux
- Machine Learning and deep learning Algorithms
- Agile Methodology
- Version control system and issue Tracking (git)
- Research and Report writing
- Data Pre-processing And Visualization
- Unity

(A) Soft Skills

Communication, Problem Solving and critical Thinking, Organization and Team player, Accountability and Adaptability, Hardworking and progressive.

Courses

Cybersecurity Essentials, cisco

Networking Essentials, Cisco

Deep Learning Essentials, IMB

Machine Learning with Python, IBM

Natural Language Processing in TensorFlow, Coursera

Declaration

I am committed to Continuous learning and improving my skills and knowledge in order to stay current in the field of AI and software development.

of Interests

Singing, Adventure, Reading, Dancing
